MANAGEMENT TIPS

Many customers call and ask questions about our management practices. The following may not work for every beekeeper, but here are some practices we suggest:

****Use Apistan®, Checkmite+™, Api-Guard® or Mite-a-Way Strips™ for Varroa Mites and Menthol packets for Tracheal Mite control, Fumagilin-B or Nozevit® to control Nosema, Honey Bee Healthy® & Amino-B-Booster™, Terra-Patties and Mega Bee Patties™ & Sugar Patties, (for building strong, healthy brood.) (Follow label directions.)**

Ventilation is critical in the beehive. Beekeepers have been improving ventilation by inexpensively modifying lids and inner covers, since the early 1900's. Use the **Cross-flow Hive Attic** Ventilated Lid and Inner Cover to reduce moisture buildup, or build your own. Use Varroa Mite Screens to help reduce mite infestation. Read magazines, go to meetings, talk to fellow beekeepers, be observant, and give your bees ventilation. Our passion is the health and well being of your bees, it doesn't have to cost unnecessary money to be effective. Ventilation and the bee's ability to move air and reduce moisture make a hostile environment for mites the year around!

Bees need a minimum of 1 deep & 1 medium or 2 deeps or 2 or 3 mediums for the brood chamber with 10 frames or 9 frames of drawn comb with 9 frame spacers.

In the early spring check for live queens and a proper brood pattern, replace any old black brood comb and frames that have an abundance of drone cells. Feed 1 to 1 sugar syrup treated with **Nozevit®** or **Fumagilin-B®** and **Honey Bee Healthy™** (feeding stimulant) & **Amino-B-Booster™**. Just before and during surplus honey production many beekeepers keep a plain grease patty on the top bars of the bottom deep. For the grease patty mix, one part Crisco®, three parts granulated sugar by weight: **no antibiotics!**

Mid September to October remove honey supers and feed 3 to 1 sugar to water syrup treated with **Nozevit®** or **Fumagilin-B®** and **Honey Bee Healthy®** (feeding stimulant).

During the winter months hives should be tipped to check weight every thirty days, more often during warm winter weather spells to be sure the hives have plenty of honey. Take note of light hives, and feed Fondant or granulated sugar on the inner cover or give them sugar syrup treated with **Nozevit®** or **Fumagilin-B®** and **Honey Bee Healthy™** (feeding stimulant).

Always use **Mega-Bee™** when the bees are low on pollen stores.

Warning, do not feed Amino-B-Booster™ going into the fall through the end of January.
