MANAGEMENT TIPS

Many customers call and ask questions about our management practices. The following may not work for every beekeeper, but here are some practices we suggest:

**Use Formic Pro Strips™ for Varroa Mites and Nozevit Plus® to control Nosema, Super DFM probiotics made by Microbials® (suggested use is 1 dose/ mo.), Honey Bee Healthy®, Amino-B-Booster™, pollen patties & Sugar Patties, (for building strong, healthy brood.) (Follow label directions.)

Ventilation is critical in the beehive. Beekeepers have been improving ventilation by inexpensively modifying lids and inner covers, since the early 1900's. Use the **Hive Topper** (pictured at the top of our home page) to reduce moisture buildup, or build your own. Use Varroa Mite Screens to help reduce mite infestation. Read magazines, go to meetings, talk to fellow beekeepers, be observant, and give your bees ventilation. Our passion is the health and well being of your bees, it doesn't have to cost unnecessary money to be effective. Ventilation and the bee's ability to move air which reduces moisture and makes a hostile environment for mites is important the year around!

Bees need a minimum of 1 deep & 1 medium or 2 deeps or 2 or 3 mediums for the brood chamber with 10 frames or 9 frames of drawn comb.

In the early spring check for live queens and a tight brood pattern, replace any old black brood comb and frames that have an abundance of drone cells. Feed 1 to 1 sugar syrup treated with Nozevit Plus®, Honey Bee Healthy™ (a feeding stimulant) Amino-B-Booster™, and Super DFM.

Mid September to October remove honey supers and feed 3 to 1 sugar to water syrup treated with Nozevit Plus®, Honey Bee Healthy® (a feeding stimulant), and the monthly treatment of Super DFM.

During the winter months hives should be checked for weight every thirty days, more often during warm winter weather spells to be sure the hives have plenty of honey. Take note of light hives, and feed Fondant or granulated sugar on the inner cover or give them sugar bricks or candy boards. Always use pollen patties when the bees are low on pollen stores but **ONLY** during brood rearing.

Warning, do not feed Amino-B-Booster™ going into the fall through the end of January..
